

VIXEL

SECURE. ANONYMOUS. FAST. GLOBAL.

VIXEL QSQ - AN INNOVATION IN THE WORLD OF CRYPTOCURRENCIES

INTRODUCTION OF VIXEL

VIXEL is based on the x11 hashing algorithm and uses 11 hashing steps with different functions (bmw, blake, jh, groestl, skein, keccak, cubehash, luffa, simd, shavite, echo).

Enhanced currency protection. The SHA256 and Scrypt systems are relatively vulnerable to cyberattacks. To overcome the x11 defenses, attackers would need to find weaknesses in each of the eleven hashes at a time.

Increased decentralization of the VIX coin. It can be mined (GPU), but ASIC is much more efficient, making the cryptocurrency less dependent on individual community members.

Customized VIXEL explorer with full visibility of transactions, chain visibility, full statics, information api, as well as number of nodes and more.

VIXEL Master nodes. These network nodes are designed to support additional services and blockchain governance mechanism. In return, they are rewarded in the form of transaction fees. In simple terms, revenue.

VIXEL QSQ - This is a multifunctional programme with a lot of functionality. It provides convenience, simplicity, anonymity, security, safety, and additional income.

VIXEL QSQ - QUICK SAFETY QUALITIVE

The program will be available for 2 operating systems.

Windows

Linux

Source and finished versions will be posted on our website and GitHub.

The available test functionality of the program will include the following features:

Personal cabinet with registration and authorization

Full coin statistics (Block Height, Hashrate, Difficulty, Nodes connected, Block reward and many other metrics)

Statistics of all pools

Ability to connect your wallet to the program and sync them for future opportunities.

Also in the test version will be available test tasks, after their completion you will receive rewards in the form of 5% of the block VIX

The weight of the program will be approximately 400/Mb.

The test version is scheduled for Q3 2024.

VIXEL COIN INFORMATION

Algorithm -> X11 Proof of Work

Coin supply -> 23000000

Coin Name -> VIXEL

Block Halving -> 210000 blocks

Tickner -> VIX

Block Reward -> 50 -> 5min

RPC Port -> 16821

Masternode Reward -> 60 %

P2P Port -> 16822

Masternode Collaratal -> 15.000 VIX

PREMINE -> 2M

Block Halving -> 210000 blocks

PROJECT ROADMAP

2024 Q1 Phase 1

Push VIX On Github
Release VIX Explorer
VIX Wallet
VIX Pool
List to Exchange

2024 Q3 Phase 3

Library optimization
Preliminary testing QSQ
Update Block Explorer
Attracting partners

2024 Q2 Phase 2

More pools
More exchangers
Node stabilization
Web wallet Design
Attracting new users

2024 Q4 Phase 4

Soon...
